Maritime Spatial Planning in Croatia

Conference on MSP Croatia

Dubrovnik, 8 May 2024

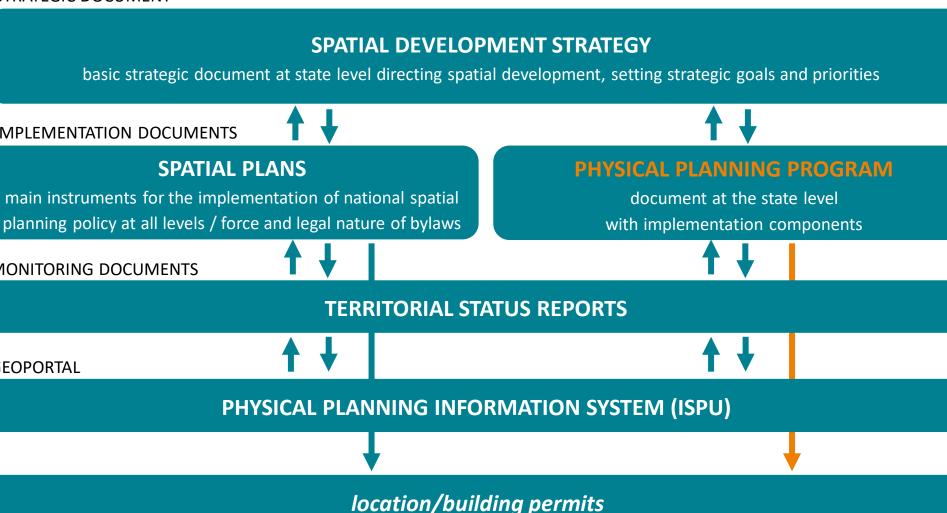

E-mail: MSP@mpgi.hr

Basic Structure of the Physical Planning System in Croatia

MSP in Exclusive Economic Zone

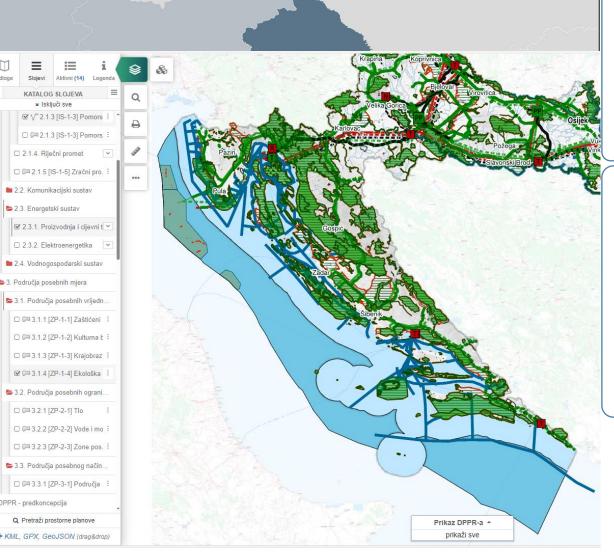

MSP is traditionally an integral part of spatial planning in Croatia – physical plans cover both land and marine areas

S pla MSP ന 4 roa MSP

STATE LEVEL

- State Plan for Spatial Development covers the internal waters and territorial sea
- Spatial Plan of the Exclusive Economic Zone covers marine waters beyond the outer limits of the territorial waters to its outer boundary / Physical Planning Program
- Spatial plans of national parks and nature parks cover marine waters within the boundaries of the plan/parc
- Urban Plans of State significance cover marine waters within the boundaries of the Plan

REGIONAL LEVEL

- County Spatial Plans cover marine waters within the county boundaries
- Urban Plans of County
 Significance cover marine waters within the boundaries of the Plan

LOCAL LEVEL

- Municipality Spatial Plans cover marine waters within the boundaries of municipality
- General Urban Plans cover marine waters within the boundaries of city
- Urban Plans cover marine waters within the boundaries of the Plan

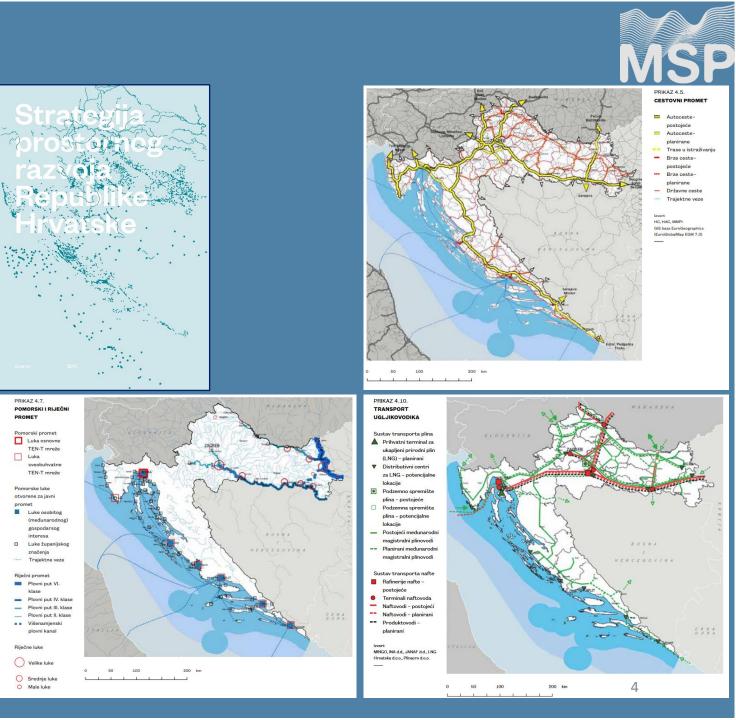

Spatial Development Strategy (2017)

- covers territorial sea and exclusive economic zone
- basic strategic document at the state level

Some of the examples of the strong tradition of marine planning as an area of special value, which the Strategy itself highlights:

- from 1967 to 1972, in cooperation with the UN, Croatia developed a programme and plan of physical planning of the Northern, Central and Southern Adriatic – Regional Spatial Plan of the Southern Adriatic 1968 and Coordination Regional Spatial Plan of the Northern Adriatic, 1972, and its direct hinterland

- 2004. **Regulation on Protected coastal area** (1000 m from the coastline and the maritime zone 300 m from the coastline) - for the purposes of preserving the identity of the coast of the Republic of Croatia and creating conditions for sustainable development of the coastal area (based on Integrated Coastal Zone Management Protocol - Barcelona Convention)

Physical Planning Program (1999, amendments 2013)

- covers territorial sea and exclusive economic zone

- document with implementation components at the state level

Izmjena i dopuna Programa prostornog uređenja Republike Hrvatske

- central place for displaying and reviewing spatial plans, geospatial data and layers

- contains all valid spatial plans with associated data and graphic representations
- allows public access to spatial plans

- allows overview (WMS) of selected maps of spatial plans of all levels as well as overlay of spatial data of the different sectors

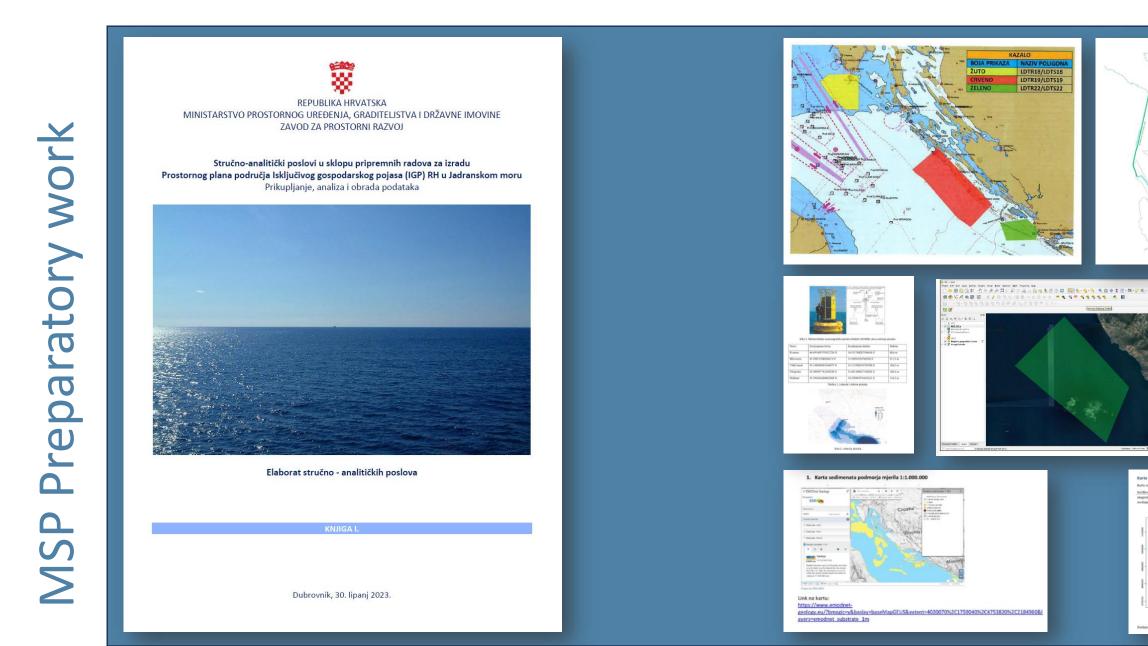

- further development of ISPU will enable direct connection and data exchange with European portals (EMODnet)

Expert Analytical Basis: Data Collection and Analysis for the MSP (2023)

□ Spatial Plan of the Exclusive Economic Zone - In progress

• 11/2023 Ministry of Physical Planning, Construction and State Assets established an Intersectoral Expert Group

- representatives of 10 ministries with competencies closely related to the use and protection of marine resources to monitor the compliance with the MSP Directive
- 28.3.2024. 1st meeting
- organizing 2nd meeting ongoing

• 12/2023 The Minister of Physical Planning, Construction and State Assets adopted the **Decision on the developement of the Spatial Plan of the Exclusive Economic Zone** (OG 2/24) and initiated the procedure for the <u>strategic assessment of the impact on</u> <u>the environment and acceptability for nature (</u>competent authority is Ministry of Economy and Sustainable Development -MESD)

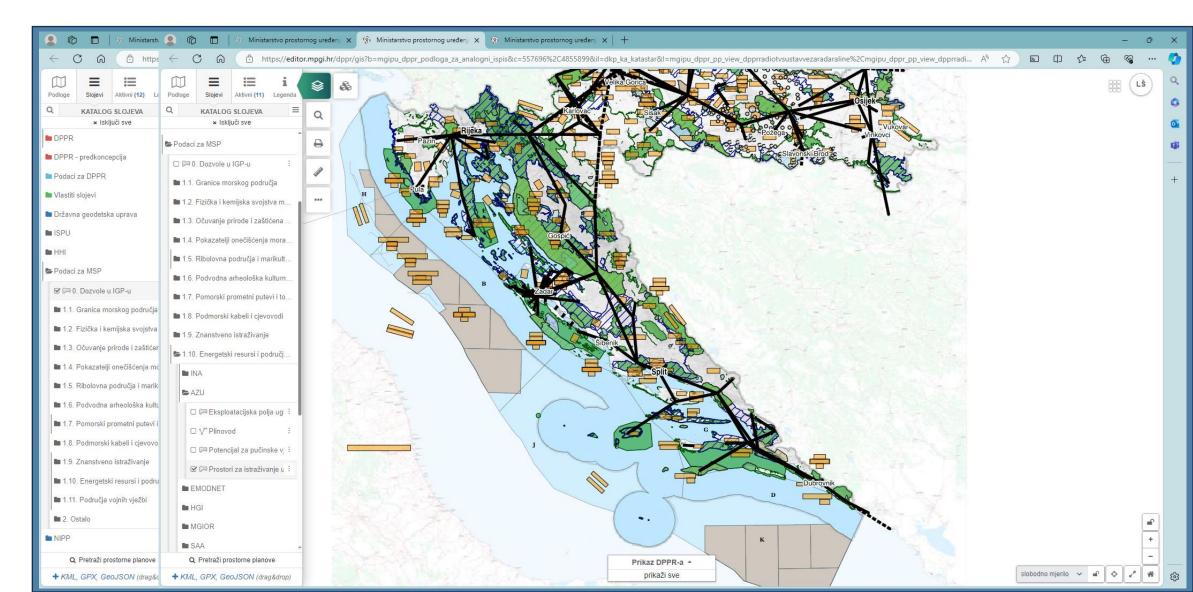

• 12/2023 The Minister of Physical Planning, Construction and State Assets adopted the **Ordinance on Spatial Plans** (OG 152/23), which enables development of the next generation of spatial plans based on geographic information system (GIS)

- ongoing meetings/collaborations/activities:
- with MSP Assistance Mechanism/DG MARE (12.12.2023.)
- with EMODnet (continuously)
- TEG workshop (13.3.2024.)
- creating the MSP data model aligned with EMODnet
- analysis through web GIS tool
